LRE/FAPE DISTRICT GUIDE

Free Appropriate Public Education Delivered Through **Least Restrictive Environment**. Vizzle Turns Policy into Practice.

Federal law requires districts to provide students with disabilities a Free Appropriate Public Education (FAPE), including education in the least restrictive environment (LRE) to the maximum extent appropriate. This requires access to grade-level curriculum and specialized differentiated instruction (SDI) before removal from general education is considered.

Vizzle gives districts a practical way to deliver FAPE through Least Restrictive Environment by embedding instructional access, alignment, and progress monitoring into daily instruction. **Vizzle** is an award-winning, standards-aligned K–12 instructional platform that supports general education, special education, and intervention settings in one system.

60,000

differentiated lessons and activities

46

K–12 courses across core subjects

Aligned to all U.S. state standards

How Vizzle Helps Districts Meet LRE Requirements

Built for SDI

Scaffolded, grade-level instruction for general education.

IEP-Aligned by Design

K–12 curriculum aligned to standards and IEP goals.

Proven & Defensible

Progress monitoring that documents access and growth.

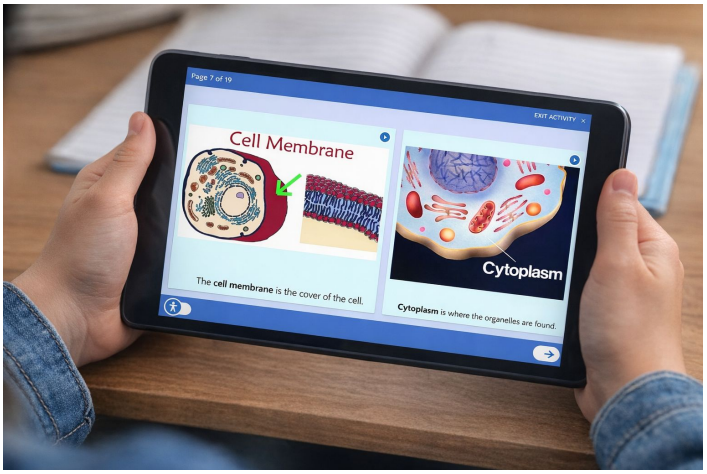

Budget-Smart, Scalable & Stable

A stable, scalable solution that fits district funding realities.

From Policy to Classroom Practice

Vizzle supports districts where LRE requirements are most tested: in daily instruction, IEP implementation, and documentation. It provides a single instructional system that allows students with disabilities to access grade-level curriculum through specialized differentiated instruction.

This is how districts move beyond intent and implement LRE consistently across classrooms.

Vizzle Operationalizes Access in Daily Instruction

With Vizzle, districts can:

- Deliver scaffolded, grade-level instruction for specialized differentiated instruction (SDI)
- Support inclusion, co-teaching, and Tier 2/3 interventions using one standardized curriculum
- Align daily instruction to IEP goals and accommodations
- Automatically capture progress data tied to instruction

This allows LRE to be implemented consistently across classrooms, schools, and grade levels.

What This Means for District Leaders

Vizzle strengthens a district's ability to:

- Demonstrate access to grade-level curriculum as part of FAPE
- Support placement decisions with instructional evidence
- Reduce reliance on pull-out as the default
- Provide clear documentation for IEP meetings, reviews, and audits

A Stable, Scalable Solution for SDI

As LRE expectations rise and vendor consolidation creates uncertainty, districts need solutions that are proven, cost-effective, and built for long-term use. Vizzle provides districts with an IDEA-fundable, scalable way to deliver and document LRE in real classrooms.

> Our charge is to make learning accessible and meaningful for every student. Vizzle helps teachers do that without adding one more thing to their plate.

Dr. A. K. Perera
Superintendent, Lancaster ISD (TX)

RethinkEd

One Platform. LRE-Ready Instruction. Clear Documentation.
